

In May of this year Kuehne Company attended a seminar hosted by Inovyn in Thailand. This meeting had chlor-alkali personnel from all over the world in attendance. The meeting allowed for an open exchange on technical issues and a review of best practices in the manufacturing of chlorine and caustic using membrane technology. Azade Zare Tabibi (Lab Manager), Manny Correia (Kearny Plant Manager) and Kevin Booth (Director of Corporate Engineering) represented Kuehne at this event. Kuehne received an award based on our twenty year relationship with Inovyn. Pictured is Azade accepting the award.
