New MUL Standards for Caustic Products Effective Immediately

We are writing to inform you of an important change regarding the Maximum Use Level (MUL) for our caustic products. This change is part of our ongoing efforts to ensure the highest quality and safety standards in our production processes.

Please rest assured that there have been no changes to our production process, and you can continue to expect the same high-quality product you are accustomed to receiving from us.

This change is in response to our supplier's updated Certificate of Analysis (COA) and is designed to align with the latest industry standards and regulatory requirements.

Current MUL Specifications

- 50% Caustic: 200 mg/L
- 25% Caustic: 400 mg/L

New MUL Specifications *Effective Immediately*

- 50% Caustic: 100 mg/L
- 25% Caustic: 200 mg/L

Our team is working diligently to ensure that all future shipments will comply with the new MUL specifications. If you have any specific concerns or require adjustments to your orders, please do not hesitate to contact our sales team at 973 589-0700.

We appreciate your understanding and cooperation as we implement these changes. Thank you for your continued trust and partnership.

Sincerely,

Kuehne Company
